

Vignesh Eswaramurthi

AI Orchestrator | Lead Quality Engineer | AI-Driven SDLC Transformation | CI/CD

✉ vignesh.eswaramurthik@gmail.com ☎ (+91) 9444571669 🔗 [LinkedIn Profile](#)

📍 Erode, Tamil Nadu, India

PROFESSIONAL SUMMARY

Accomplished **AI Orchestrator and Lead Quality Engineer** with 8+ years of expertise spanning banking, fintech, and enterprise domains. Proven track record of leading **AI-driven SDLC transformation** initiatives, architecting scalable automation frameworks, and orchestrating AI agents to modernize enterprise applications. Strategic leader skilled in building human-in-the-loop governance, mentoring cross-functional teams, and integrating modern tooling—including **Semantic Kernel, LangChain, CrewAI, GitHub Actions for CI/CD**, and **AI-driven testing**. Adept at transforming ambiguous requirements into structured agentic workflows and translating AI metrics into actionable insights for stakeholders.

CORE COMPETENCIES & TECHNICAL SKILLS

AI & Orchestration Frameworks	Semantic Kernel, LangChain, LangGraph, AutoGen, CrewAI, Copilot Studio, Azure AI Foundry
Programming & Architecture	.NET / C# / ASP.NET Core, Java, Page Object Model (POM), Agentic Workflows
DevOps & CI/CD	GitHub Actions (4+ Years), SDLC Transformation, AI Governance & Guardrails, Git, Maven
Automation Tools (QA & RPA)	Healenium (Self-healing locators), UiPath (RPA & Test Manager), Selenium WebDriver, Appium, REST API
Management & Methodologies	Agile/Scrum, Jira, Test & AI Strategy, Defect Triage, Requirement Traceability

PROFESSIONAL EXPERIENCE

iSON Xperiences

Chennai, India

Lead Quality Engineer / AI Orchestrator

April 2025 – Present

- **SDLC Transformation:** Led AI-driven SDLC transformation across 3 concurrent banking application releases, owning the master strategy for integrating AI agents into the development lifecycle—all 3 releases went live on schedule with zero P1 defects.
- **Agentic Workflows:** Orchestrated AI agents for automated requirement analysis, test generation, and intelligent defect triage, establishing human-in-the-loop governance and reducing unplanned rework by 40%.
- **Team Leadership & Governance:** Managed a team of 5 engineers, mentoring them on AI governance, guardrails, and prompt engineering.

Senior QA Engineer / AI Automation Lead

January 2024 – April 2025

- Spearheaded AI automation testing initiatives within the core banking domain, collaborating closely with development teams to identify, report, and resolve critical defects.
- Explored and integrated AI-driven test capabilities, leveraging **Healenium** for self-healing locators and experimenting with **LangChain/CrewAI** for test data generation, improving automation stability and reducing test maintenance efforts.

Techies Infotech Pvt Ltd

Chennai, India

Software Test Engineer

September 2018 – January 2024

- **Framework Architecture:** Built the company's first scalable automation framework from zero; this framework became the standard template across 6 subsequent client projects.
- **API Automation:** Designed and deployed scalable REST API automation frameworks from scratch to ensure robust backend validation.
- **Mobile Testing & DevOps:** Delivered mobile automation coverage for Android apps, reducing manual execution time from 3 days to just 45 minutes.
- **Data Validation & RPA:** Deployed UiPath RPA bots for repetitive regression workflows and data validation, laying the groundwork for future AI orchestration and saving 12 person-hours per sprint cycle.

EDUCATION

Bachelor of Engineering, Civil Engineering

August 2012 – June 2016

Kongu Engineering College, Perundurai, Erode

Languages: English, Tamil, Romanian (Elementary)
